

# E by SIPLACE

## E-Basic: One machine for everything

With the **CP12/PP** head, a single E by SIPLACE becomes a highly versatile workhorse. It is the ideal solution for prototype production, NPI, short runs, contract manufacturing and many more.

If you need more speed, for example to produce submodules, the **CP14** is your placement head of choice. Whatever you decide, the Basic configuration gives you a standalone machine that can be expanded to grow with your requirements.

**Tell us what you need  We will find the right configuration for you**

Basic, Flex and Volume are popular configurations that cover the majority of common applications. Electronics production is diverse, however, and constantly changing.

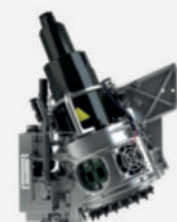

Discuss your needs with your E-team  they will gladly help you to find your ideal E-configuration.

### E-Facts

E-Speed	up to 45,300 cph
E-Component Range	01005 <input type="checkbox"/> 200 mm x 110 mm
E-Feeder Slots	120
E-PCB Size	1,200 mm x 460 mm
